

# RUBBER FLOOR

**ARROWQUIP'S RUBBER FLOOR** is the quietest cattle chute flooring system on the market. The true rubber floor is supported by 7-gauge metal floor pans with drainage spouts, and allows cattle to move confidently through the chute by eliminating the stress caused by slipping.

- Maintenance-free, molded rubber flooring
- Only virgin rubber from Goodyear® is used in our mats
- Heavy-duty rubber mats are 3/4" thick
- Supported with 7-gauge metal floor pans from front to back
- Features drainage spouts between the metal floor pans and on the edges of them
- Secured with stainless steel Huck® Magna-Lok® rivets, to prevent rust and corrosion
- Comes standard in the Q-Catch® 87 Series and Q-Power™ 107 Series cattle chutes and 700 Series portable cattle handling systems
